

Diploma thesis „Symptoms of stuttering in dynamic" view consider the problematic balbuties from many aspects. This is focused on the one of the most severe and obvious kinds of disturbance in communication skills. The research project of the diploma thesis deals with analysis of lives of Czech and Arabic/Israeli children with balbuties. Apart from the complex analysis I enclose more detailed information about symptoms, ways and possible diagnosis; within the context of practical part I describe methods and techniques which I was using and various therapy possibilities.
